

SILENCE AND AMBIGUITY REINFORCE INVISIBILITY AND EXCLUSION IN RESEARCH ENVIRONMENTS

Out workers report higher rates of:

- »»» Job Satisfaction
 - »»» Productivity
 - »»» Positive Attitudes
 - »»» Commitment to the work
- ...in comparison to closeted employees.

(GRIFFITH & HEBL 2002, JOURNAL OF APPLIED PSYCHOLOGY. DAY & SCHOENRADE 1997, PERSONNEL PSYCHOLOGY)

Workplace queer-friendliness can be assessed with respect to LGBTQ+ researchers' openness about their identity.

Openness of Identity among LGBTQ+ People in the Life Sciences

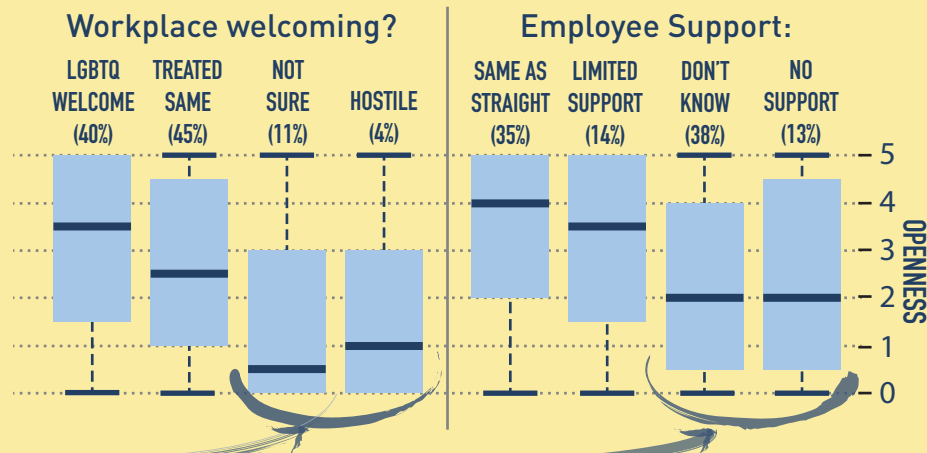

LGBTQ+ researchers in the Life Sciences are much less likely to disclose their identity to colleagues & coworkers than to their friends & family.

The question is.. **WHY?**

LGBTQ+ researchers who feel *unwelcomed, unsure or unsupported* in the workplace are **less open** about their identity.

Average degree of identity openness of respondents broken down by workplace environment ratings

ACADEMICS (ESPECIALLY GRADUATE STUDENTS) ARE THE LEAST AWARE OF WHAT LGBTQ+ SUPPORT IS AVAILABLE TO THEM

Percent of respondents that **do not know** what support is available for LGBTQ+ employees:

42% of academics

vs.

29% of non-academics

vs.

58% of grad students

38% of overall participants

THE NATIONAL LANDSCAPE OF LGBTQ+ RIGHTS IN THE USA AFFECTS THE CAREER CHOICES OF LGBTQ+ RESEARCHERS

In just three years, same-sex marriage went from legal in 6 states to legal in all 50 states

NOVEMBER 6TH, 2012

JUNE 26TH, 2015

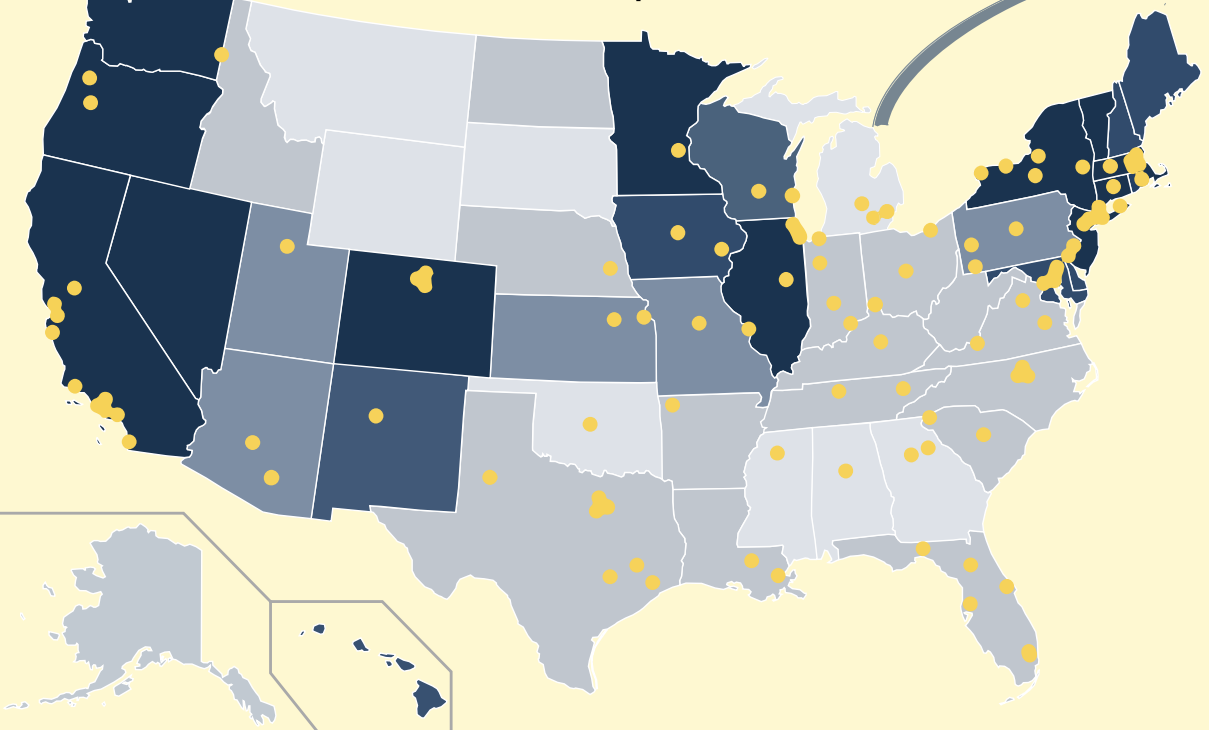

- Same-sex marriage has given LGBTQ+ researchers access to very important rights:
- »»» Spousal packages & spousal hire
 - »»» Spouses included on insurance & benefits
 - »»» Spouses entitled to pension upon death
 - »»» Citizenship opportunities for international queers with domestic partners

HOWEVER, THE UNITED STATES IS STILL A PATCHWORK OF IMPORTANT LGBTQ+ RIGHTS

Map of states with pro-LGBTQ+ legislation & policies

● Locations of the 115 top research institutions

How does Michigan measure up?

- Marriage Equality
- Prohibits employment discrimination
- Prohibits housing discrimination
- Hate crime consideration
- Prohibits public accommodations discrimination
- Bans insurance exclusions for transgender healthcare
- Prohibits education discrimination
- Facilitates gender marker change on official documents

absence

of pro-LGBTQ+ legislation & policies measurably affects the stigma experienced by individuals.

(PACHANKIS & HATZENBUEHLER 2013, BASIC AND APPLIED SOCIAL PSYCHOLOGY)

Only **35%**

of top R1 and R2 research universities are located in states that provide full legislative support for LGBTQ+ rights.

WHAT CAN YOU DO TO SUPPORT LGBTQ+ COLLEAGUES?

interpersonally

DO:

- ››› Mention LGBTQ+ culture or rights positively or signal your support in other ways
- ››› Let the individual lead the way when it comes to disclosure
- ››› Politely wait for someone to use or mention their pronouns
- ››› Use neutral pronouns & non-binary language
- ››› Consider the context in which a colleague disclosed to you
- ››› Challenge/"call-in" anti-LGBTQ+ opinions and actions (when you are silent, you are complicit)

IT MIGHT SEEM LOW-EFFORT OR SILLY, BUT VISIBLE RAINBOWS DO HELP SIGNAL A QUEER-FRIENDLY ENVIRONMENT.

DON'T:

- ››› Make assumptions about gender identity or sexual orientation based on appearance
- ››› Forcefully confront a colleague you suspect is queer ("outing")
- ››› "Out" anyone to other colleagues or your PI without permission.

institutionally

- ››› Inform ALL students and new hires about their benefits & rights.
- ››› Use explicitly LGBTQ-inclusive language in written policies & benefits (including job offers)
- ››› Create, support, and distribute information on institutional policies that make up for state-level legislative failures
- ››› Inform all students & new hires of anti-discrimination policies & how to seek recourse
- ››› Make LGBTQ-inclusive/supportive policies easy to find online.
